## Session 1: Moving Toward a System of Learning

## Homework 1: I love it vs. I am not interested

People respond differently to trainings. This homework assignment is intended to draw out your own experience either as a participant in a training or as a trainer. In order to learn from our collective experiences, we will be collecting these and integrating them into future sessions. Please do not share names or other identifiers.

Instructions: Complete the following two scenarios. Use additional space if you need it.

1.	From your experience, write down an example that shows how staff has enjoyed
	training. We do not want names of people. We would like to know: What happened?
	Where? Who was involved? What factors contributed to the staff enjoying the
	training?

2. From your experience, write down an example that shows how staff has resisted training. We do not want names of people. We would like to know: What happened? Where? Who was involved? What factors contributed to the staff resisting the training?
